

REQUEST FOR INFORMATION FOR THE NEXT GENERATION OF VESSEL TRACKING SYSTEM SOLUTION

PSA Marine (PSAM) would like to embark on the Next Generation of VTS and AIS system, which aims to enhance safety and operation efficiency for both Marine Pilots & Command Centre by means of predictive forecasting vessel traffic and anchorage allocation. It also includes features that aims to uplift the productivity via means of tasks automation, 2D/3D Mapping and Interactive Graphical User Interface.

PSAM welcomes vendors with prior experience with VTS and AIS to share and present their ready product, bespoke solution and/or developing solutions to us.
